Wood Forum

WOOD-BASED ZERO CITIES

TRONDHEIM 27. - 29. SEPTEMBER 2017

WELCOME TO

WOOD-BASED ZERO CITIES

Forum Wood Building Nordic 2017 invites you to Trondheim, Norway for the sixth Nordic conference focusing on zero emission cities and neighbourhoods. Cities are growing, how do we make them grow green in the future?

Wood Building Nordic is the main conference for wood construction in the Nordic countries and part of the international Forum-Holzbau organization. The conference brings together academics and practitioners to exchange experiences and learn from the forefront in the field. Experience lectures from international speakers accompanied by an exhibition where different organizations show their latest products and services. The building industry, researchers and building authorities will come together to learn, find inspiration and exchange experiences.

The conference will be held at Clarion Hotel Brattøra in Trondheim. This will serve as the meeting place where business meets technology, science and art.

See you there!
